

Félix Robaglia

WEB DEVELOPER

Graduate of the web development school HETIC, I just finished my 2 years apprenticeship in the advertising department of the French newspaper Le Monde, M Publicité.

HETIC taught me about project management, front and back development, SQL databases, HTML5/CSS3 Integration, native JavaScript, CMS (Wordpress), UX / UI, Photoshop & Illustrator, Vue.js & React.js.

Passionate about the media industry, I see web technologies as an essential tool in order to provide quality information.

As a logical continuation to my apprenticeship, I am looking to find a position as a front-end web developer in the United Kingdom, starting November 2021.

Interests

- News and culture
- Game design
- Chess
- Astronomy

Work Experience

| Groupe Le Monde | M Publicité

From September 2019 to October 2021

Development of websites deployed by the advertising agency of the Le Monde group (which owns Le Monde, Le HuffPost, Télérama, L'Obs, Courrier International).

I also had the opportunity to work with the journalists of the "Pixels" section of Le Monde, for articles with an original format requiring a process of web development.

JavaScript, Vue.js, Nunjucks, Sass, Node.js, PHP, Wordpress, MySQL & NoSQL

| Le Monde

From June to September 2019

During my internship at Le Monde, I was charged with developing an in-house website under the supervision of an experienced team, who shared with me their knowledge and a strong teamwork methodology.

The website's purpose was to provide a tool allowing the automation and maintenance of Le Monde's business to business flows with various actors, for example the company Amazon, who receives the newspaper PDF every day to offer it on the Kindle.

PHP w/ CakePHP, HTML/CSS & JavaScript, Windows Task Scheduler executing batch files
